CONTENTS

G. Fang and L. Qian. Linear average and stochastic $n$-widths of Besov embeddings on Lipschitz domains 9

B. Shekhtman and L. Skrzypek. On the non-uniqueness of minimal projection in $L_p$ spaces 23

S.G. Moreno and E.M. Garcia-Caballero. Linear interpolation and Sobolev orthogonality 35

S. Gogyan. On convergence of Weak Thresholding Greedy Algorithm in $L^1(0, 1)$ 49

R. Cruz-Barroso and S. Delvaux. Orthogonal Laurent polynomials on the unit circle and snake-shaped matrix factorizations 65

A.J. Durán. Generating orthogonal matrix polynomials satisfying second order differential equations from a trio of triangular matrices 88

S. Waldron. Increasing the polynomial reproduction of a quasi-interpolation operator 114

C. Berg and R. Szwarc. Bounds on Turán determinants 127

P. Oswald and T. Shingel. Splitting methods for SU(N) loop approximation 174

H.-J. Ruan, W.-Y. Su and K. Yao. Box dimension and fractional integral of linear fractal interpolation functions 187

F. Littmann. Zeros of Bernoulli-type functions and best approximations 213

Contents continued from outside back cover

M. Rahman. A q-analogue of the 9-j symbols and their orthogonality .......................... 239
Yu.A. Farkov. On wavelets related to the Walsh series .................................................. 259
J.L. López, P. Pagola and E. Pérez Sinusía. A simplification of Laplace's method:
Applications to the Gamma function and Gauss hypergeometric function .................. 280
M. Ehler. Nonlinear approximation schemes associated with nonseparable
wavelet bi-frames ............................................................................................................ 292
S. Naboko, I. Pchelintseva and L.O. Silva. Discrete spectrum in a critical
coupling case of Jacobi matrices with spectral phase transitions by uniform
asymptotic analysis ......................................................................................................... 314
D. Karp and S.M. Sitnik. Inequalities and monotonicity of ratios for generalized
hypergeometric function ............................................................................................... 337
F. Balogh and M. Bertola. Regularity of a vector potential problem and its
spectral curve ................................................................................................................ 353
Y. Lipman. Stable Moving Least-Squares ....................................................................... 371
I.A. López P. Operators associated with the Jacobi semigroup .................................... 385
C. de Boor. Multivariate polynomial interpolation: Aitken–Neville sets and
generalized principal lattices ....................................................................................... 411
