REGULAR PAPERS

**Statistical Signal Processing**

Robust $H_\infty$ Filtering for a Class of Nonlinear Networked Systems With Multiple Stochastic Communication Delays and Packet Dropouts ........................................ H. Dong, Z. Wang, and H. Gao 1957

Refining Decisions After Losing Data: The Unlucky Broker Problem .................................. S. Marrano, V. Matta, and F. Mazzarella 1980

The Estimation of the Fourth-Order Cumulant for Dependent Data: Consistency and Asymptotic Normality .......................................................... E. Masry 1991

Computationally Efficient Sparse Bayesian Learning via Belief Propagation ........................................ X. Tan and J. Li 2010

**Adaptive Signal Processing**

A Sparse-Interpolated Scheme for Implementing Adaptive Volterra Filters ................................ E. L. O. Batista, O. J. Tobias, and R. Seara 2022

A PNLM Algorithm With Individual Activation Factors ............................................. F. C. de Souza, O. J. Tobias, R. Seara, and D. R. Morgan 2036

Efficient NLMS and RLS Algorithms for Perfect and Imperfect Periodic Sequences ............... A. Carini 2048

**Digital and Multirate Signal Processing**

A Procedure to Adapt Filter Banks to Finite-Length Signals ........................................... R. Bernardini and R. Rinaldo 2060

Group Lifting Structures for Multirate Filter Banks I: Uniqueness of Lifting Factorizations ............... C. M. Brislawn 2068

Group Lifting Structures for Multirate Filter Banks II: Linear Phase Filter Banks ................. C. M. Brislawn 2078

Design of Regular Wavelets Using a Three-Step Lifting Scheme ..................................... R. Eslami and H. Radha 2088

Multirate Filterbank Design: A Relaxed Commutant Lifting Approach ................................ D. Du, W. Bhosri, and A. E. Frazho 2102

**Nonlinear Signal Processing**

A New Approach to Pruning Volterra Models for Power Amplifiers ................................................ C. Crespo-Cadenas, J. Reina-Tosina, M. J. Madero-Ayora, and J. Muñoz-Cruzado 2113

**Machine Learning**

Recursive Least Squares Dictionary Learning Algorithm .................................................. K. Skrætting and K. Engan 2121

Performing Nonlinear Blind Source Separation With Signal Invariants ................................ D. N. Levin 2131

Bounded Component Analysis of Linear Mixtures: A Criterion of Minimum Convex Perimeter ......................................................... S. Cruces 2141

**SAM Sensor Array and Multichannel Processing**

A General Criterion for Analog Tx-Rx Beamforming Under OFDM Transmissions ........ J. Via, I. Santamaría, V. Elvira, and R. Eickhoff 2155

(Contents Continued on Back Cover)
