Intelligent financial time series forecasting: A complex neuro-fuzzy approach with multi-swarm intelligence
Chunshien Li, Tai-Wei Chiang
Special section

ReSySTER: A hybrid recommender system for Scrum team roles based on fuzzy and rough sets
Ricardo Colomo-Palacios, Israel González-Carrasco, José Luis López-Cuadrado, Ángel García-Crespo
Special section

DFIS: A novel data filling approach for an incomplete soft set
Hongwu Qin, Xiuxin Ma, Tutut Herawan, Jasni Mohamad Zain
Special section

Multi-label classification using error correcting output codes
Tomasz Kajdanowicz, Przemsław Kazienko
Special section

A rainfall forecasting method using machine learning models and its application to the Fukuoka city case
S. Monira Sumi, M. Faisal Zaman, Hideo Hirose
Special section

Combined classifier based on feature space partitioning
Michał Woźniak, Bartosz Krawczyk
Special section

Nonparametric statistical analysis for multiple comparison of machine learning regression algorithms
Bogdan Trawiński, Magdalena Smętek, Zbigniew Telec, Tadeusz Lasota
Special section

BEM and FEM results of displacements in a poroelastic column
Bettina Albers, Stavros A. Savidis, Ercan Taşan, Otto von Estorff, Malte Gehlken
Regular section

A modified state variable diagram method for determination of positive realizations of linear continuous-time systems with delays
Tadeusz Kaczorek
Regular section

Normalized finite fractional differences: Computational and accuracy breakthroughs
Rafał Stanisławski, Krzysztof J. Latawiec
Regular section

Observer-based controller design of time-delay systems with an interval time-varying delay
Mai Viet Thuấn, Vu Ngọc Phạt, Hieu Trinh
Regular section

Novel fault detection criteria based on linear quadratic control performances
Dušan Krokavec, Anna Filasová
Regular section

Data-driven models for fault detection using kernel PCA: A water distribution system case study
Adam Nowicki, Michał Grochowski, Kazimierz Duzinkiewicz
Regular section

Nash equilibrium design and price-based coordination in hierarchical systems
Michał P. Karpowicz
Regular section
- The island model as a Markov dynamic system
  Robert Schaefer, Aleksander Byrski, Maciej Smołka
  Regular section
- Designing a ship course controller by applying the adaptive backstepping method
  Anna Witkowska, Roman Śmierzchalski
  Regular section
- Customized crossover in evolutionary sets of safe ship trajectories
  Rafał Szłapczyński, Joanna Szłapczyńska
  Regular section
- Regulation of p53 by siRNA in radiation treated cells: Simulation studies
  Krzysztof Puszyński, Roman Jaksik, Andrzej Świerniak
  Regular section
