1. Invited paper
Multicriteria Engineering Optimization Problems: Statement, Solution and Applications
Roman Statnikov, Josef Matusov...Pages 355-375

2. OriginalPaper
On the Union of Closed Balls Property
Chadi Nour, Jean TakchePages 376-389

3. OriginalPaper
Stationarity and Regularity of Infinite Collections of Sets. Applications to Infinitely Constrained Optimization
Alexander Y. Kruger, Marco A. LópezPages 390-416

4. OriginalPaper
A Unifying Approach to Variational Relation Problems
R. P. Agarwal, M. Balaj, D. O'ReganPages 417-429

5. OriginalPaper
Beyond Canonical DC-Optimization: The Single Reverse Polar Problem
Giancarlo Bigi, Antonio Frangioni...Pages 430-452

6. OriginalPaper
Necessary Optimality Conditions for Higher-Order Infinite Horizon Variational Problems on Time Scales
Natália Martins, Delfim F. M. TorresPages 453-476

7. OriginalPaper
On Weak and Strong Kuhn–Tucker Conditions for Smooth Multiobjective Optimization
Regina S. Burachik, M. M. RizviPages 477-491

8. OriginalPaper
Stability for Properly Quasiconvex Vector Optimization Problem
C. S. Lalitha, Prashanto ChatterjeePages 492-506

9. OriginalPaper
Qualitative Properties of Eigenvectors Related to Multivalued Operators and some Existence Results
Houssam ChrystehPages 507-533

10. OriginalPaper
Second-Order Optimality Conditions for Strict Efficiency of Constrained Set-Valued Optimization
S. J. Li, S. K. Zhu, X. B. Li Pages 534-557

11. OriginalPaper
Stability of Implicit Multifunctions in Banach Spaces
N. Q. Huy, D. S. Kim, K. V. Ninh Pages 558-571

12. OriginalPaper
Some Applications of Linear Programming Formulations in Stochastic Control
Dan Goreac, Oana-Silvia Serea Pages 572-593

13. BriefCommunication
On the Probability of Correct Selection in Ordinal Comparison over Dynamic Networks
Hyeong Soo Chang, Jiaqiao Hu Pages 594-604

14. OriginalPaper
Extragradient Methods and Linesearch Algorithms for Solving Ky Fan Inequalities and Fixed Point Problems
Phan Tu Vuong, Jean Jacques Strodiot... Pages 605-627

15. BriefCommunication
An Adaptive Univariate Global Optimization Algorithm and Its Convergence Rate for Twice Continuously Differentiable Functions
James M. Calvin, Yvonne Chen... Pages 628-636

16. OriginalPaper
The Accuracy of Interior-Point Methods Based on Kernel Functions
Manuel V. C. Vieira Pages 637-649

17. OriginalPaper
The Myerson Value and Superfluous Supports in Union Stable Systems
E. Algaba, J. M. Bilbao, R. van den Brink... Pages 650-668

18. BriefCommunication
A New Approach to Stochastic Optimization
Moawia Alghalith Pages 669-672

19. OriginalPaper
Linear Programming with Uncertain Data: Some Extensions to Robust Optimization
B. D. Craven, S. M. N. Islam Pages 673-679

20. OriginalPaper
Energy Minimizing Mountain Ascent
Gašper Jaklič, Tadej Kanduč... Pages 680-693
1. Brief Communication
   Robust Guaranteed Cost Decentralized Stabilization for Uncertain Discrete Large-Scale Systems with Delays via State Feedback and Output Feedback
   Xiaohong Nian, Zhaomei Sun, Xia Wang Pages 694-706

2. Original Paper
   Risk-Return Trade-off with the Scenario Approach in Practice: A Case Study in Portfolio Selection
   B. K. Pagnoncelli, D. Reich, M. C. Campi Pages 707-722

3. Original Paper
   A Note on the Paper “Regularization Proximal Point Algorithm for Common Fixed Points of Nonexpansive Mappings in Banach Spaces”
   Nguyen Thu Hang, Truong Minh Tuyen Pages 723-725
