A spatial panel ordered-response model with application to the analysis of urban land-use development intensity patterns
N. Ferdous · C.R. Bhat  

Conditional versus unconditional industrial agglomeration: disentangling spatial dependence and spatial heterogeneity in the analysis of ICT firms' distribution in Milan
G. Espa · G. Arbia · D. Giuliani  

Empirical likelihood estimation of the spatial quantile regression
P. Kostov  

Evaluating the impact of data quantity, distribution and algorithm selection on the accuracy of 3D subsurface models using synthetic grid models of varying complexity
K.E. MacCormack · J.J. Brodeur · C.H. Eyles  

Exploring links between juvenile offenders and social disorganization at a large map scale: a Bayesian spatial modeling approach
J. Law · M. Quick
