REGULAR PAPERS

Optimal Wireless Communications With Imperfect Channel State Information ......................... Y. Hu and A. Ribeiro 2751
Sparse Spatial Spectral Estimation: A Covariance Fitting Algorithm, Performance and Regularization .........................
........................................................................................................... J. Zheng and M. Kaveh 2767
Cooperative Cognitive Networks: Optimal, Distributed and Low-Complexity Algorithms .............................
.............................................................................. G. Zheng, S. Song, K.-K. Wong, and B. Ottersten 2778
Time Varying Autoregressive Moving Average Models for Covariance Estimation .............................
........................................................................................................... A. Wiesel, O. Bibi, and A. Globerson 2791
Analysis of Sum-Weight-Like Algorithms for Averaging in Wireless Sensor Networks .............................
........................................................................................................... F. Iutzeler, P. Ciblat, and W. Hachem 2802
Variational Bayesian Algorithm for Quantized Compressed Sensing ......................... Z. Yang, L. Xie, and C. Zhang 2815
