REGULAR PAPERS

**Statistical Signal Processing**

Fast LCMV-Based Methods for Fundamental Frequency Estimation ..........................................................

J. R. Jensen, G.-O. Glentis, M. G. Christensen, A. Jakobsson, and S. H. Jensen 3159

**Adaptive Signal Processing**

DCD-RLS Adaptive Filters With Penalties for Sparse Identification ................. Y. V. Zakharov and V. H. Nascimento 3198

**Digital and Multirate Signal Processing**

Yield-Optimized Superoscillations ................................................................. E. Katzav and M. Schwartz 3113

(Contents Continued on Page 3020)
Machine Learning

Efficient Methods to Compute Optimal Tree Approximations of Directed Information Graphs ........................................... C. J. Quinn, N. Kiyavash, and T. P. Coleman 3173
A Binary Independent Component Analysis Approach to Tree Topology Inference ............... H. Nguyen and R. Zheng 3071

Signal Processing for Communications

Transceiver Design for Distributed STBC Based AF Cooperative Networks in the Presence of Timing and Frequency Offsets .......................................................... A. A. Nasir; H. Mehrpouyan, S. Durrani, S. D. Blostein, R. A. Kennedy, and B. Ottersten 3143
Compressive Link Acquisition in Multiuser Communications .......... X. Li, A. Rueetschi, A. Scaglione, and Y. C. Eldar 3229
Wideband Spectrum Sensing Based on Sub-Nyquist Sampling .............................................................. C.-P. Yen, Y. Tsai, and X. Wang 3028

MIMO Communications & Signal Processing

Distributed Linear Precoder Optimization and Base Station Selection for an Uplink Heterogeneous Network .......................................................... M. Hong and Z.-Q. Luo 3214
Robust MIMO Precoding for Several Classes of Channel Uncertainty .................................................................................. J. Wang, M. Bengtsson, B. Ottersten, and D. P. Palomar 3056
Carrier Cooperation Can Reduce the Transmit Power in Parallel MIMO Broadcast Channels With Zero-Forcing ...................... C. Hellings, S. Herrmann, and W. Utschick 3021
Coordinated Beamforming With Relaxed Zero Forcing: The Sequential Orthogonal Projection Combining Method and Rate Control .................................................................................. J. Park, G. Lee, Y. Sung, and M. Yukawa 3100

Signal Processing for Sensor Networks

Supermodular Game for Power Control in TOA-Based Positioning ................. A. Moragrega, P. Closas, and C. Ibars 3246
Adaptive Learning Vector Quantization for Online Parametric Estimation .............................................................. P. Bianchi and J. Jakubowicz 3119

Implementation of Signal Processing Systems

Pruned Bit-Reversal Permutations: Mathematical Characterization, Fast Algorithms and Architectures .................................................. M. M. Mansour 3081

EDICS—Editors’ Information Classification Scheme .................................................................................. 3260
Information for Authors .................................................................................. 3261

About the Cover: The figure on the cover depicts the probability of error with $\mu_{s_0}$ and $\mu_{s_1}$; $\mu_{e} = 0$, $\sigma_e^2 = 0.1$, $\mu_{\sigma_e} = 0$, $\mu_{\sigma_1} = 0$, $\sigma_{\sigma_e}^2 = 1$, $\sigma_{\sigma_1}^2 = 5$, $\sigma_{\gamma_1}^2 = \sigma_{\gamma_2}^2 = 1$, as provided in “Collaborative Human Decision Making With Random Local Thresholds,” by Wimalajeewa and Varshney, on page 2975.
