Immunogenicity and protective efficacy of a DNA vaccine against Venezuelan equine encephalitis virus aerosol challenge in nonhuman primates

Pages 7345-7350
Lesley C. Dupuy, Michelle J. Richards, Douglas S. Reed, Connie S. Schmaljohn

Overview of expression of hepatitis B surface antigen in transgenic plants

Pages 7351-7362
Zheng-jun Guan, Bin Guo, Yan-lin Huo, Zheng-ping Guan, Ya-hui Wei

HSV-1 amplicon vectors that direct the in situ production of foot-and-mouth disease virus antigens in mammalian cells can be used for genetic immunization

Pages 7363-7372
Alejandra D’Antuono, Andrea S. Laimbacher, Jose La Torre, Virginia Tribulatti, Carina Romanutti, Patricia Zamorano, Valeria Quattrocchi, Elisabeth M. Schraner, Mathias Ackermann, Cornel Fraefel, Nora Mattion

Needle-free jet injection of small doses of Japanese encephalitis DNA and inactivated vaccine mixture induces neutralizing antibodies in miniature pigs and protects against fetal death and mummification in pregnant sows

Pages 7373-7380
Jun-ichi Imoto, Tomohiro Ishikawa, Atsushi Yamanaka, Misako Konishi, Kenji Murakami, Tomoyuki Shibahara, Masanori Kubo, Chang-Kweng Lim, Masataka Hamano, Tomohiko Takesaki, Ichiro Kurane, Haruhide Udagawa, Yoshihiro Mukuta, Eiji Konishi

Study designs for timely estimation of influenza vaccine effectiveness using European sentinel practitioner networks

Pages 7381-7388
Marta Valenciano, Esther Kissling, Bruno Christian Ciancio, Alain Moren

Vaccine preventable diseases in returned international travelers: Results from the GeoSentinel Surveillance Network

Pages 7389-7395
Andrea K. Boggild, Francesco Castelli, Philippe Gautret, Joseph Torresi, Frank von
Tick-borne encephalitis after vaccination: Vaccine failure or misdiagnosis  
Original Research Article  
Pages 7396-7400  
Marta Grgič-Vitek, Tatjana Avšič-Županc, Irena Klavs

Associations of the correlates of protection and implication on the statistical power for demonstrating non-inferiority: Application of a re-sampling method on a large phase III influenza vaccine clinical trial  
Original Research Article  
Pages 7401-7406  
R. Bugarini, D. Casula, N. Groth, M. Lattanzi, S. Holmes, A. Podda

Dendritic cells devoid of IL-10 induce protective immunity against the protozoan parasite Trypanosoma cruzi  
Original Research Article  
Pages 7407-7413  
Catalina D. Alba Soto, Maria Elisa Solana, Carolina V. Poncini, Agustina M. Pino-Martinez, Valeria Tekiel, Stella Maris González-Cappa

Effect of a combination DNA vaccine for the prevention and therapy of Trypanosoma cruzi infection in mice: Role of CD4+ and CD8+ T cells  
Original Research Article  
Pages 7414-7419  
Alberto Yairh Limon-Flores, Rodrigo Cervera-Cetina, Juan L. Tzec-Arjona, Lorena Ek-Macias, Gilma Sánchez-Burgos, Maria J. Ramirez-Sierra, J. Vladimir Cruz-Chan, Nicole R. VanWynsberghe, Eric Dumonteil

Healthy young and middle age adults: What will it take to vaccinate them for influenza?  
Original Research Article  
Pages 7420-7422  
Lori Uscher-Pines, Jurgen Maurer, Arthur Kellerman, Katherine M. Harris

Racial disparities in diarrhea-associated hospitalizations among children in five US States, before and after introduction of rotavirus vaccine  
Original Research Article  
Pages 7423-7426  
Catherine Yen, Claudia A. Steiner, Marguerite Barrett, Aaron T. Curns, Katherine Hunter, Emily Wilson, Umesh D. Parashar

A clinical trial to evaluate the safety and immunogenicity of the LEISH-F1 + MPL-SE vaccine when used in combination with sodium stibogluconate for the treatment of mucosal leishmaniasis  
Original Research Article  
Pages 7427-7435  
Alejandro Llanos-Cuentas, Wessmark Calderón, María Cruz, Jill A. Ashman, Fabiana P. Alves, Rhea N. Coler, Lisa Y. Bogatzki, Sylvie Bertholet, Elsa M. Laughlin, Stuart J.
The development of persistent duck hepatitis B virus infection can be prevented using antiviral therapy combined with DNA or recombinant fowlpoxvirus vaccines

Combined peptides of human enterovirus 71 protect against virus infection in mice
